

**24x 1ml - 1.4ml Screw cap  
tubes/ PCR Strip  
Magnetic Separation Rack  
MSR24SC**

Catalog # (P/N): MSR24SC

**Precautions:**

CAUTION - STRONG MAGNETIC FIELD. This Permagen Labware Magnetic Separation Rack contains very strong neodymium iron boron (NdFeB) magnets. People with pacemakers or other forms of Implantable cardioverter-defibrillators (ICD's) should always avoid this product as it may interfere with its operation. Never allow this product to come into contact with other magnets, metal, magnetized media such as credit cards etc., as damage and or injury can occur. Do not Autoclave or heat above 80°C, doing so will damage the magnets.

---

**USER INFORMATION**

**Product Description:**

Permagen Labware's 24x 1.0 mL screw cap tubes/ PCR Strip Magnetic Separation Rack is designed for small scale separations of many common magnetic bead chemistries and protocols with up to (24) 1.0 mL screw cap tubes and (2) PCR Strips. Kit includes two clips which are used to push PCR strips closer to the magnets if desired. The magnets in our separation rack will pull beads to the inside wall of each well, leaving a clean area for removal.

**Care/ Cleaning:**

If solutions are spilled onto the separation rack carefully rinse with tap water and allow to air dry completely before use. A mild soap may also be used if more extreme cleaning is necessary. Always use care when storing product when not in use.
